

NORA JIN

Technology Application Owner · Application Lifecycle & Release Management · Cloud & API Support

PMP · AWS Certified AI Practitioner · Monash MIT (2025–2027) · Available from Jul 2026

+61 0466 492 426 · nuojin@gmail.com · [linkedin.com/in/norajin-it](https://www.linkedin.com/in/norajin-it) · Melbourne, VIC · 485 Visa (Applying) — Full rights Jul 2026

PROFESSIONAL SUMMARY

Technology specialist with 3+ years of application lifecycle management experience across enterprise software, vehicle digital platforms, and cloud-based systems (China, Sweden, Australia, Malaysia, UK). Proven track record managing end-to-end application lifecycles — from design and implementation through to release, support, incident management, and continuous improvement — across regulated, multi-vendor environments. At ECARX, oversaw change and release management for in-vehicle digital applications with Volvo and Polestar OEM partners, establishing operational best practices including Go/No-Go gating, root-cause analysis workflows, and Jira-based application monitoring pipelines. Hands-on experience with Microsoft Azure, REST APIs, relational databases, AWS cloud platforms, and vendor coordination across managed service providers. Holds PMP certification and AWS Certified AI Practitioner credential. Currently completing a Master of IT at Monash University; full-time work rights available from July 2026.

WORK EXPERIENCE

Product Manager — Application Lifecycle & Release · ECARX — Vehicle Digital Systems | China & Sweden May 2023 – Apr 2024

- ▶ Managed end-to-end application lifecycle for in-vehicle digital platform applications across CN and EU markets; defined Go/No-Go gating criteria and phased release milestones, governing change and release management to ensure zero-delay parallel delivery across production and R&D environments.
- ▶ Owned incident and defect lifecycle management across CN–EU dual environments; led cross-module root-cause analysis, coordinated R&D, testing, and QA teams, and established a standardised defect closure process that reduced average issue resolution cycles by ~30% — a measurable improvement in operational best practices.
- ▶ Served as primary application liaison between Chinese engineering teams and Volvo/Polestar OEM partners (managed service providers); independently produced compliant delivery reports and coordinated cross-timezone stakeholder engagement to sustain vendor partnership continuity and application support accountability.
- ▶ Synthesised OEM feedback and change-impact assessments into structured release documentation, governing feature iteration and version stability validation across enterprise application environments.
- ▶ Built Jira-based application monitoring dashboards tracking sprint velocity, defect trends, and release readiness; prepared operational reporting for CN and EU leadership, enabling continuous improvement and informed change decisions at key delivery checkpoints.

Software Testing Engineer · Softcom Dynamics | China & Sweden

May 2022 – May 2023

- ▶ Designed and executed system-level and integration test cases for enterprise software and vehicle applications; used CANoe and Simulation Box to validate CAN/LIN protocol compliance. Developed Python automated regression scripts on Linux, reducing manual test cycles and supporting application support operations.
- ▶ Participated in joint defect reviews and root-cause analysis with Volvo and Polestar R&D teams on-site in Gothenburg; developed cross-cultural stakeholder engagement skills in a regulated, multi-vendor application environment.

INTERNSHIP EXPERIENCE

Product & Advisory Lead — NexStar 2025 · HelloRide Global · City of Melbourne | Melbourne Nov 2025 – Dec 2025

- ▶ Led application discovery, user research, and competitive analysis to define go-to-market strategy for HelloRide Global's AU market entry; translated insights into structured product and application recommendations with clear operational rationale.
- ▶ Developed front-end application features (JavaScript + AWS) delivering a working product increment within a 6-week sprint; awarded NexStar Excellence Award — top performer across 30+ participants, recognised by the City of Melbourne and ACASE.

Full-Stack Developer & Application Lead · FutureLab | AU · MY · UK

Jun 2025 – Jul 2025

- ▶ Built front-end and back-end integration (AWS Lambda + Firebase) for an online mentoring platform; delivered core application modules covering user authentication, relational data storage, and API services within timeline, coordinating across a 3-country vendor team (AU/MY/UK).

- Led final stakeholder technical showcase; managed cross-timezone delivery coordination and application handover, earning high recognition from clients and programme mentors.

PROJECTS

Polestar P417 International BEV Project (ECARX × Polestar) Jun 2023 – Apr 2024

- Managed full application lifecycle for Geely and Volvo BEV platform projects applying PMBOK 10 knowledge areas; implemented cross-functional change governance with JIRA Kanban risk tracking, quality control, and operational dashboards reported at Polestar–Geely shareholder meetings; both projects delivered on schedule to the European market via critical path analysis and Agile release management.

Stack: JIRA · Agile · PMBOK · Kanban · Cross-national Application Delivery (China / Sweden)

PathwayIQ — Victorian Career Guidance Platform Apr 2026 – Present

- Led full application lifecycle as PM and technical contributor; defined zero-data-storage architecture, governed iterative release sprints, and built a 5-page SPA with Three.js WebGL, intelligent autocomplete, and an AI-powered labour market data integration (JSA/DESE, Oxford/ABS, NCVET/VTAC); deployed continuously on Vercel with Agile release management.

Stack: Next.js · Node.js · Python · Three.js · SPA · Vercel

GlowCheck — Youth UV Protection Monitoring Platform Mar 2026 – Apr 2026

- Architected and operated a serverless application backend (AWS Lambda + API Gateway + OpenWeatherMap) with <200ms response time; designed S3 + Lambda + Athena data pipeline for application analytics and UV trend monitoring; produced bilingual operational documentation; delivered on time and in full.

Stack: AWS Lambda · API Gateway · Node.js · S3 · Athena · OpenWeatherMap

Volvo V216 In-Vehicle Infotainment Platform · Softcom Dynamics × Volvo May 2022 – May 2023

- Executed system-level integration test cases across HMI, multimedia, navigation, Bluetooth, and OTA upgrade application modules for the Volvo V216 IVI system; validated CAN/LIN protocol compliance using CANoe; developed Python regression scripts and collaborated with Volvo Sweden R&D on defect root-cause analysis.

Stack: CANoe · Simulation Box · Python · Linux · CAN/LIN · Test Automation

Cloud Pose Recognition — Kubernetes Elastic Deployment Mar 2025 – May 2025

- Developed and deployed a containerised FastAPI + YOLOv8 application to Kubernetes; conducted Locust load testing across 1–8 Pods and optimised peak response time from 17.8s to 10.5s (41% reduction), demonstrating cloud-native application monitoring and continuous improvement practices.

Stack: FastAPI · Docker · Kubernetes · Locust · Python · AWS

CORE SKILLS & TECHNICAL EXPERTISE

Application Mgmt Application Lifecycle Management · Change Management · Release Management · Incident Management · Root Cause Analysis · Go/No-Go Gating · Application Support · Operational Best Practices · Continuous Improvement · Application Monitoring

Project & Delivery PMP · PMBOK 10 Knowledge Areas · Agile / Scrum · Risk & Stakeholder Management · Vendor Management · Managed Service Provider Coordination · OEM Partner Management (Volvo, Polestar) · Executive Reporting · Delivery Governance

Technical Python · JavaScript · Java · SQL · Relational Databases · Linux · Node.js · FastAPI · Firebase · Docker · Kubernetes · Next.js · Vue 3 · REST APIs · API Integration

Cloud & Platforms Microsoft Azure · AWS (Lambda · S3 · DynamoDB · API Gateway · Cognito · Amplify) · Cloud Platforms · Gemini AI · AWS Certified AI Practitioner

Testing / QA System & Integration Testing · CANoe · Simulation Box · CAN/LIN Protocol Validation · Test Automation (Python/Linux) · Defect Triage · Jira

Languages & Certs Mandarin (Native) · English (Fluent) · Japanese (Elementary) · PMP · AWS Certified AI Practitioner

EDUCATION

Master of Information Technology · Monash University, Melbourne 2025 – 2027

Bachelor of Economics and Finance · Changchun Normal University, China 2016 – 2020
