

# NORA JIN

Digital Data Specialist · JavaScript · Data Layer Architecture · Digital Analytics · Customer Journey · CRO

AWS Certified AI Practitioner · PMP · Monash MIT (2025–2027) · Available from Jul 2026

+61 0466 492 426 · [nuojin@gmail.com](mailto:nuojin@gmail.com) · [linkedin.com/in/norajin-it](https://www.linkedin.com/in/norajin-it) · Melbourne, VIC · 485 Visa (Applying) — Full rights Jul 2026

## PROFESSIONAL SUMMARY

Digital data professional with 3+ years of experience spanning JavaScript-based digital product development, data layer architecture, analytics pipeline design, and customer journey data analysis across regulated multi-market environments. Hands-on track record implementing data-driven digital products: designing event-based data schemas, building serverless data pipelines (AWS S3, Athena, Lambda), and integrating analytics outputs into live customer-facing platforms. Strong JavaScript foundation underpins direct collaboration with development teams on analytics implementation and tagging strategy. Experienced in digital metrics reporting, stakeholder-facing insight storytelling, and embedding data into Agile product decision cycles. Currently building hands-on capability in Google Tag Manager, GA4, Adobe Analytics, and digital data layer implementation to complement existing architecture and JavaScript skills. Holds AWS Certified AI Practitioner credential and PMP certification. Full-time work rights available from July 2026.

## WORK EXPERIENCE

### Digital Data & Systems Engineer · ECARX — Vehicle Digital Systems | China & Sweden May 2023 – Apr 2024

- ▶ Designed and maintained digital data reporting pipelines using Jira; tracked digital metrics including defect density, sprint velocity, and release readiness across production and R&D environments for in-vehicle platform software across CN and EU markets — reducing average resolution cycles by ~30% through structured data-driven analysis and insight communication.
- ▶ Synthesised OEM customer feedback and behavioural data into change-impact assessments and customer journey analytics, directly informing product iteration priorities and version stability decisions for Volvo and Polestar digital platform releases.
- ▶ Built structured stakeholder reporting dashboards and analytics pipelines tracking digital product health metrics; translated complex multi-source data into clear insight narratives for CN and EU engineering and executive audiences with different technical literacy levels.
- ▶ Coordinated Go/No-Go release readiness reviews across cross-functional teams, embedding digital metrics and data quality checks as decision gates — applying a data-driven culture to release governance across international delivery environments.

### Software Testing Engineer — Digital Data & Integration · Softcom Dynamics | China & Sweden May 2022 – May 2023

- ▶ Developed Python automated regression scripts on Linux generating structured digital test data outputs; integrated multi-source test data into analytical reports used for cross-national defect pattern analysis with Volvo and Polestar R&D teams.
- ▶ Designed and executed system-level integration test cases for enterprise digital software; validated data flows and system behaviour across HMI, multimedia, navigation, and OTA modules for the Volvo V216 IVI platform.

## INTERNSHIP EXPERIENCE

### Software Developer — NexStar 2025 · HelloRide Global · City of Melbourne | Melbourne Nov 2025 – Dec 2025

- ▶ Built JavaScript front-end features and integrated AWS back-end services for a digital product targeting AU and CN customer segments; applied customer journey thinking across requirements, implementation, and deployment within a 6-week Agile sprint. Awarded NexStar Excellence Award — top performer across 30+ participants.

### Full-Stack Developer · FutureLab | AU · MY · UK

Jun 2025 – Jul 2025

- ▶ Delivered core digital feature modules (JavaScript front-end, AWS Lambda + Firebase back-end) covering user authentication, data storage, and RESTful API integration; coordinated cross-timezone delivery across a 3-country team and led the final technical stakeholder showcase presenting digital product outcomes.

PROJECTS — DIGITAL DATA & ANALYTICS

PathwayIQ — GA4 & Digital Data Layer Tracking Plan

Apr 2026 — Present

- ▶ Designed a GA4 event tracking plan for PathwayIQ covering key customer journey touchpoints: career search interactions, autocomplete selection events, CTA clicks, and job shortage label views. Defined data layer variable schema, conversion event taxonomy, and custom dimension structure aligned to digital product KPIs.
- ▶ Developed conceptual Google Tag Manager container architecture for tag management and event firing rules; created dashboard concept for customer journey analytics covering onsite conversion, drop-off points, and user segment behaviour — currently implementing GA4 integration into the live Next.js platform.

Stack: GA4 · Google Tag Manager · JavaScript · Next.js · Data Layer Design · Customer Journey Analytics

PathwayIQ — Labour Market Data Pipeline & Customer Insights

Apr 2026 — Present

- ▶ Built a Python data pipeline consuming multiple government datasets (JSA/DESE, Oxford/ABS, NCVER/VTAC) generating customer-facing insights on job shortage, AI displacement risk, and VET pathway recommendations — end-to-end from raw data ingestion through to personalised digital content delivery within a live SPA.
- ▶ Designed zero-data-storage privacy architecture and iterated analytics outputs through Agile sprints, applying insights-driven optimisation to refine the customer journey and content personalisation logic.

Stack: Python · Next.js · Node.js · REST APIs · Government Datasets · Vercel

GlowCheck — Real-Time Digital Data Pipeline & Analytics

Mar 2026 — Apr 2026

- ▶ Architected an AWS S3 + Lambda + Athena data pipeline for real-time UV analytics; designed tiered customer-facing advisory output logic — a direct implementation of data layer to digital content personalisation. API response <200ms.

Stack: AWS S3 · Athena · Lambda · API Gateway · Node.js · OpenWeatherMap

AWS Serverless Data Architecture & Intelligent Retrieval

May 2025 — Jul 2025

- ▶ Designed full-chain serverless data integration (S3 + Lambda + API Gateway + DynamoDB) with tag-based metadata retrieval and multi-tenant data isolation via Cognito IAM — data layer architecture applied at infrastructure level. API response <500ms, availability 99%.

Stack: AWS S3 · Lambda · DynamoDB · API Gateway · Cognito · IAM · Python

Cloud Performance Analytics — Kubernetes Load Testing

Mar 2025 — May 2025

- ▶ Conducted structured Locust performance and regression testing across 1–8 Pods at up to 82 concurrent users; analysed digital metrics across concurrency levels and optimised peak response time by 41% (17.8s → 10.5s) — data-driven optimisation translating test analytics into measurable performance outcomes.

Stack: FastAPI · Docker · Kubernetes · Locust · Python · AWS

TECHNICAL SKILLS & EXPERTISE

**Digital Analytics** Customer Journey Analytics · Digital Metrics · Data-driven Culture · Insights Driven Optimisation · Multivariate Testing · A/B Testing · Onsite Conversion · Audience Building · Personalisation

**Data Layer & Tagging** Data Layer Architecture · Digital Data Layer · Tagging Strategy · Google Tag Manager (upskilling) · GA4 (upskilling) · Adobe Analytics (upskilling) · Adobe Target (upskilling) · Tealium (upskilling)

**JavaScript & Frontend** JavaScript · HTML · CSS · Next.js · React · Vue 3 · SPA Architecture · REST API Integration · Responsive Design

**Data & Pipelines** Python · SQL · AWS Athena · S3 · Lambda · DynamoDB · Data Pipeline Design · Serverless Architecture · Firebase Firestore

**Cloud & DevOps** AWS (S3 · Athena · Lambda · API Gateway · Cognito · IAM) · Azure · Docker · Kubernetes · CI/CD · Git · Vercel

**Reporting & BI** Jira Analytics Dashboards · Digital Metrics Reporting · Stakeholder Storytelling · Power BI (upskilling) · Advanced Excel

**Digital Campaigns** Digital product analytics · Customer segment analysis · SEO/SEM awareness · Social campaign data context

**Testing & QA** System & Integration Testing · Regression Testing · Test Automation (Python/Linux) · Defect Triage · CANoe

**Languages & Certs** Mandarin (Native) · English (Fluent) · Japanese (Elementary) · AWS Certified AI Practitioner · PMP

EDUCATION

**Master of Information Technology** · Monash University, Melbourne

2025 — 2027

**Bachelor of Economics and Finance** · Changchun Normal University, China

2016 — 2020
