

NORA JIN

Full Stack Software Engineer · JavaScript · Next.js · React · Node.js · Python · Docker · CI/CD · Azure · AWS

AWS Certified AI Practitioner · PMP · Monash MIT (2025–2027) · Available from Jul 2026

+61 0466 492 426 · nuojin@gmail.com · [linkedin.com/in/norajin-it](https://www.linkedin.com/in/norajin-it) · Melbourne, VIC · 485 Visa (Applying) — Full rights Jul 2026

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of hands-on experience building and integrating enterprise applications across cloud-native backends, containerised microservices, and full-stack web platforms (China, Sweden, Australia, Malaysia, UK). Proven ability delivering production systems using JavaScript, Next.js, React, Node.js, Python, Docker, SQL, REST APIs, and CI/CD pipelines — with architectural parallels to Azure Functions and Azure Service Bus through extensive AWS serverless development (Lambda, API Gateway, S3, DynamoDB). Strong background in system integration, regression testing, testable software design, and Agile delivery in regulated, multi-vendor environments. Holds AWS Certified AI Practitioner credential and PMP certification. Completing a Master of IT at Monash University; actively upskilling in .NET Core API, Azure Functions, Azure DevOps, and Microsoft SQL Server; full-time work rights available from July 2026.

WORK EXPERIENCE

Full Stack Engineer / Digital Systems Engineer · ECARX — Vehicle Digital Systems | China & Sweden May 2023 – Apr 2024

- ▶ Managed full defect lifecycle for in-vehicle digital platform enterprise applications across CN and EU markets using Jira; performed cross-module defect triage, root-cause analysis, and regression test tracking across production and R&D dual environments, reducing average resolution cycles by ~30%.
- ▶ Coordinated system integration test execution and release readiness reviews (Go/No-Go) across Chinese and Swedish engineering teams, aligning regression test coverage with OEM delivery milestones for Volvo and Polestar product lines — applying testable software design principles to multi-environment CI/CD workflows.
- ▶ Built structured Jira reporting pipelines tracking sprint velocity, defect density, and build stability across Agile delivery cycles; prepared and presented technical delivery reports for CN and EU engineering leadership.
- ▶ Synthesised OEM customer feedback into change-impact assessments and supported version stability validation across feature iterations in both R&D and production enterprise application environments.

Software Testing Engineer · Softcom Dynamics | China & Sweden

May 2022 – May 2023

- ▶ Designed and executed system-level and integration test cases for enterprise software and vehicle systems; used CANoe and Simulation Box to validate CAN/LIN protocol compliance. Independently developed Python automated regression scripts on Linux, significantly reducing manual testing cycles.
- ▶ Integrated multi-source test data into structured test reports; participated in joint defect reviews with Volvo and Polestar R&D teams on-site in Gothenburg, supporting cross-national system integration and defect localisation.

INTERNSHIP EXPERIENCE

Software Developer — NexStar 2025 · HelloRide Global · City of Melbourne | Melbourne Nov 2025 – Dec 2025

- ▶ Built front-end features (JavaScript, HTML, CSS) and integrated back-end AWS services delivering a production-ready increment within a 6-week Agile sprint; took ownership across requirements, implementation, CI/CD deployment. Awarded NexStar Excellence Award — top performer across 30+ participants.

Full-Stack Developer · FutureLab | AU · MY · UK

Jun 2025 – Jul 2025

- ▶ Delivered core feature modules for an online mentoring platform using JavaScript front-end with AWS Lambda and Firebase back-end, covering user authentication, relational data storage, and RESTful API integration — design patterns consistent with dependency injection and layered service architecture.
- ▶ Coordinated cross-timezone delivery across a 3-country team (AU/MY/UK) using Agile practices; led final technical stakeholder showcase.

PROJECTS

- Cloud Pose Recognition — Kubernetes Elastic Deployment

Mar 2025 – May 2025

 - Developed a FastAPI + YOLOv8 real-time pose recognition service; containerised with Docker and deployed to a Kubernetes cluster with async concurrent request handling and horizontal Pod auto-scaling — infrastructure as code principles applied throughout.
 - Conducted Locust stress and regression testing across 1–8 Pods; optimised peak response time from 17.8s to 10.5s (41% reduction) at 82 concurrent users, validating production-grade elastic scalability.

Stack: FastAPI · YOLOv8 · Docker · Kubernetes · Locust · Python · AWS

- AWS Serverless Multimedia Storage & Intelligent Retrieval System

May 2025 – Jul 2025

 - Architected full-chain serverless integration — S3 + Lambda + API Gateway + DynamoDB — supporting multimedia upload, tag-based retrieval, and metadata search; designed Cognito authentication with fine-grained IAM permission control for multi-tenant isolation. Functional equivalent to Azure Functions + Azure Service Bus event-driven architecture. API response <500ms, availability 99%.

Stack: AWS S3 · Lambda · DynamoDB · API Gateway · Cognito · IAM · Python

- PathwayIQ — Career Guidance Platform (Next.js Full-Stack)

Apr 2026 – Present

 - Independently built a full-stack 5-page SPA using Next.js and Node.js backend with REST API integration; implemented Three.js WebGL animated interface, intelligent career autocomplete, and zero-data-storage privacy architecture applying testable software design patterns. Integrated Python data pipeline consuming government datasets (JSA/DESE, Oxford/ABS, NCVER/VTAC) to power AI-driven job shortage and displacement risk labelling. Deployed via CI/CD on Vercel.

Stack: Next.js · Node.js · Python · Three.js · SPA · REST APIs · Vercel · CI/CD

- GlowCheck — Serverless UV Protection Platform

Mar 2026 – Apr 2026

 - Architected serverless backend (AWS Lambda + API Gateway) integrating OpenWeatherMap UV real-time API with <200ms response time; designed S3 + Lambda + Athena data pipeline for UV trend analytics and monitoring.

Stack: AWS Lambda · API Gateway · S3 · Athena · Node.js · OpenWeatherMap

- Volvo V216 In-Vehicle Infotainment Platform · Softcom Dynamics × Volvo

May 2022 – May 2023

 - Designed and executed system-level integration test cases covering HMI, multimedia, navigation, Bluetooth, and OTA upgrade modules; validated CAN/LIN protocol compliance using CANoe; developed Python automated regression scripts on Linux and collaborated with Volvo Sweden R&D on cross-national defect localisation.

Stack: CANoe · Simulation Box · Python · Linux · CAN/LIN · Test Automation · Regression Tests

TECHNICAL SKILLS

Languages JavaScript · HTML · CSS · Python · Java · SQL · Bash

Frontend Next.js · React · Vue 3 · Three.js · Responsive Design · SPA Architecture

Backend & API Node.js · FastAPI · REST APIs · AWS Lambda · API Gateway · Firebase · Serverless Architecture · Dependency Injection patterns

Cloud — AWS S3 · DynamoDB · Lambda · API Gateway · Cognito · Amplify · Athena · EC2 · IAM · AWS Certified AI Practitioner

Cloud — Azure Azure (Microsoft Azure) · Azure Functions (upskilling) · Azure Service Bus (upskilling) · Azure DevOps (upskilling)

Databases SQL · DynamoDB · Firebase Firestore · Oracle · DBeaver · Microsoft SQL Server (upskilling) · Entity Framework (upskilling)

DevOps & Infra Docker · Kubernetes · CI/CD Pipelines · Git · GitHub · Linux · Vercel · Infrastructure as Code principles

Testing & QA Regression Tests · System & Integration Testing · Test Automation (Python/Linux) · Mocking Frameworks · Testable Software Design · CANoe · Simulation Box · Defect Triage · Jira

Design & Method Design Patterns · Agile / Scrum · Enterprise Applications · Cross-functional Delivery · CAN/LIN Protocol Validation

AI / ML Gemini AI · YOLOv8 · AWS AI Services · AI-assisted Workflows

Languages & Certs Mandarin (Native) · English (Fluent) · Japanese (Elementary) · AWS Certified AI Practitioner · PMP

EDUCATION

Master of Information Technology · Monash University, Melbourne

2025 – 2027

Bachelor of Economics and Finance · Changchun Normal University, China

2016 – 2020
