Hiring Manager, Customer & Product Insights

Bupa HI Holdings Pty Ltd, Melbourne VIC

RE: Senior Customer & Product Insights Analyst — Bupa

Dear Hiring Manager,

I am applying for the Senior Customer & Product Insights Analyst role at Bupa. My background sits at the intersection of product analytics, data pipeline development, and stakeholder-facing insight storytelling — built across three years of delivering customer and product insights in regulated, cross-functional environments across China, Sweden, and Australia.

At ECARX, working with Volvo and Polestar as OEM partners, I owned the analytics layer across in-vehicle digital platform delivery. This meant building Jira-based dashboards tracking defect density, sprint velocity, and release readiness, synthesising OEM customer feedback and behavioural data into structured change-impact assessments, and translating those findings into actionable product recommendations for engineering and executive stakeholders in both CN and EU markets. A standardised root-cause analytics workflow I implemented reduced average resolution cycles by approximately 30% — a measurable commercial outcome driven directly by how the data was structured and communicated. That experience of influencing product decisions through clear insight narratives, presented to audiences with different technical literacy across time zones, is precisely what this role requires.

On the technical side, I work with Python and SQL for data pipeline development and analysis, and with cloud-based data infrastructure — AWS S3, Athena, and Lambda — for data ingestion, transformation, and analytics at scale. Most concretely, I built the Python data pipeline underpinning PathwayIQ, a live digital product for Victorian students, consuming government datasets (JSA/DESE, Oxford/ABS, NCVET/VTAC) to surface customer-facing insights on job shortage risk, AI displacement, and career pathways. This is end-to-end product analytics: from raw government data through to insight outputs that shape the user journey. I am actively upskilling in Power BI, Google Analytics, and Adobe Analytics to align with Bupa's specific tooling, and I bring an Agile ways of working mindset from consistent delivery in sprint-based, cross-functional product teams.

I hold a PMP certification and AWS Certified AI Practitioner credential, and I am completing a Master of IT at Monash University with full-time work rights from July 2026. I would welcome the opportunity to discuss how my analytics and product insights experience fits Bupa's team.

Yours sincerely,

Nora Jin
