

NORA JIN

Customer & Product Insights Analyst · SQL · Python · Data Visualisation · Stakeholder Engagement · Agile

PMP · AWS Certified AI Practitioner · Monash MIT (2025–2027) · Available from Jul 2026

+61 0466 492 426 · nuojin@gmail.com · [linkedin.com/in/norajin-it](https://www.linkedin.com/in/norajin-it) · Melbourne, VIC · 485 Visa (Applying) — Full rights Jul 2026

PROFESSIONAL SUMMARY

Customer and product insights professional with 3+ years of experience translating complex data into actionable recommendations that drive commercial impact across digital product environments. Track record building analytics pipelines, SQL-driven dashboards, and stakeholder reporting in regulated, cross-functional settings — including customer analytics for digital platform delivery at ECARX with Volvo and Polestar OEM partners. Hands-on with Python data pipelines, SQL, cloud-based data infrastructure (AWS S3, Athena, Lambda), and government dataset analytics integrated into live digital products. Experienced in Agile ways of working, executive-level insight storytelling, and embedding analytics into product decision cycles. Holds PMP certification and AWS Certified AI Practitioner credential. Completing a Master of IT at Monash University; actively upskilling in Power BI and Google Analytics; full-time work rights available from July 2026.

WORK EXPERIENCE

Product & Customer Insights Analyst · ECARX — Vehicle Digital Systems | China & Sweden May 2023 – Apr 2024

- ▶ Delivered end-to-end customer and product analytics for in-vehicle digital platform releases across CN and EU markets; synthesised OEM customer feedback, defect trend data, and sprint velocity metrics into change-impact assessments and actionable recommendations that directly informed product roadmap and feature prioritisation decisions.
- ▶ Built Jira-based analytics dashboards tracking defect density, sprint velocity, release readiness, and build stability across Agile delivery cycles; produced executive stakeholder reporting for CN and EU leadership at key product delivery checkpoints — translating raw pipeline data into clear insight narratives with commercial framing.
- ▶ Led cross-module root-cause analysis and customer journey triage across CN–EU dual environments; established a standardised analytics and closure workflow that reduced average issue resolution cycles by ~30%, demonstrating how structured data insight drives measurable operational and commercial outcomes.
- ▶ Served as primary insights liaison between Chinese engineering teams and Volvo/Polestar OEM partners; independently produced compliant delivery reports and coordinated cross-timezone stakeholder engagement, ensuring product insights were communicated clearly and acted upon across business and technical audiences.
- ▶ Contributed to requirements analysis and feature prioritisation by synthesising customer feedback and behavioural data into structured product insights, supporting iterative digital product improvement and version stability validation.

Software Testing Engineer — Data & Integration Analytics · Softcom Dynamics | China & Sweden May 2022 – May 2023

- ▶ Designed and executed system-level integration test cases and developed Python automated regression scripts on Linux, generating structured test data outputs used in multi-source analytics and defect pattern analysis.
- ▶ Integrated multi-source test data into structured analytical reports; participated in joint defect reviews with Volvo and Polestar R&D teams in Gothenburg, communicating technical insights to cross-cultural engineering stakeholders.

INTERNSHIP EXPERIENCE

Product & Advisory Lead — NexStar 2025 · HelloRide Global · City of Melbourne | Melbourne Nov 2025 – Dec 2025

- ▶ Conducted customer research and competitive analysis to define product positioning and go-to-market strategy for HelloRide Global's AU market entry; translated customer segment insights across AU and CN contexts into actionable product recommendations with clear commercial rationale. Awarded NexStar Excellence Award — top performer across 30+ participants.

Full-Stack Developer & Product Lead · FutureLab | AU · MY · UK

Jun 2025 – Jul 2025

- ▶ Delivered core feature modules for an online mentoring platform, including user data storage and RESTful API services; managed cross-timezone delivery across a 3-country team (AU/MY/UK) and led the final stakeholder showcase, presenting product outcomes and insights to clients and programme mentors.

PROJECTS — ANALYTICS & DATA

PathwayIQ — Labour Market Analytics & Career Insights Platform

Apr 2026 – Present

- ▶ Built a Python data pipeline consuming multiple government datasets (JSA/DESE, Oxford/ABS, NCVER/VTAC) to generate AI-powered customer-facing insights covering job shortage alerts, AI displacement risk tiers, and VET pathway recommendations — end-to-end product analytics integrated into a live digital product serving Victorian Year 10–12 students.
- ▶ Led full product lifecycle as PM and data engineer; defined zero-data-storage architecture, applied Agile ways of working across iterative sprints, and shipped a 5-page SPA with intelligent career autocomplete and a dynamic labour market insights layer deployed continuously on Vercel.

Stack: Python · Next.js · Node.js · REST APIs · Government Datasets (JSA/DESE · Oxford/ABS · NCVER/VTAC) · Vercel

GlowCheck — UV Data Analytics & Monitoring Pipeline

Mar 2026 – Apr 2026

- ▶ Designed an AWS S3 + Lambda + Athena data pipeline for UV trend analytics and visualisation, generating tiered customer-facing advisory outputs based on real-time OpenWeatherMap data; demonstrated end-to-end analytics pipeline design from data ingestion through to actionable customer insight delivery at <200ms response time.

Stack: AWS S3 · Athena · Lambda · API Gateway · Node.js · OpenWeatherMap

AWS Serverless Analytics & Intelligent Retrieval System

May 2025 – Jul 2025

- ▶ Architected full-chain data integration: S3 + Lambda + API Gateway + DynamoDB supporting multimedia upload, tag-based retrieval, and metadata analytics; implemented Cognito authentication with fine-grained IAM control for multi-tenant data isolation. API response <500ms, availability 99%.

Stack: AWS S3 · Lambda · DynamoDB · API Gateway · Cognito · IAM · Python

Cloud Performance Analytics — Kubernetes Elastic Deployment

Mar 2025 – May 2025

- ▶ Conducted Locust load and regression testing across 1–8 Pods; analysed performance data across concurrency levels (up to 82 concurrent users) and optimised peak response time from 17.8s to 10.5s (41% reduction) — a data-driven engineering insight turned into a concrete commercial outcome.

Stack: FastAPI · Docker · Kubernetes · Locust · Python · AWS

CORE SKILLS & TECHNICAL EXPERTISE

Analytics & Insights Customer Analytics · Product Analytics · Customer Journey Analytics · Customer Insights · Product Insights · A/B Testing · Actionable Recommendations · Insight Storytelling · Commercial Impact Analysis

Data & SQL SQL · Python · Data Pipelines · Data Visualisation · Dashboarding · AWS Athena · DynamoDB · Oracle · Firebase Firestore · DBeaver

Dashboarding Jira Analytics Dashboards · Data Visualisation · Power BI (upskilling) · Google Analytics (upskilling) · Adobe Analytics (upskilling)

Digital Product Digital Product Environment · Agile Ways of Working · Product Roadmap · Backlog Prioritisation · Sprint Analytics · Release Readiness Reporting · OKRs

Cloud & Infra AWS (S3 · Athena · Lambda · API Gateway · DynamoDB · Cognito · IAM) · Azure · Serverless Architecture · REST APIs

Stakeholder Eng. Executive Reporting · Cross-functional Stakeholder Engagement · OEM Partner Management (Volvo, Polestar) · Cross-timezone Communication · Bilingual Reporting (EN/ZH)

Technical Python · JavaScript · Node.js · SQL · Java · Docker · Next.js · CI/CD · Git · Linux

Languages & Certs Mandarin (Native) · English (Fluent) · Japanese (Elementary) · PMP · AWS Certified AI Practitioner

EDUCATION

Master of Information Technology · Monash University, Melbourne

2025 – 2027

Bachelor of Economics and Finance · Changchun Normal University, China

2016 – 2020
